

Software Engineering Unit 2 - Course UE23CS341

Introduction to Testing

- Testing verifies software behaves as expected.
- Mocking replaces real dependencies with test doubles.

Software Engineering Unit 2 - Course UE23CS341

Stubs and Spies

- A stub returns canned answers.
- A spy records how it was called.

Software Engineering Unit 2 - Course UE23CS341

Test-Driven Development

- Red: write a failing test first.
- Green: make it pass.
- Refactor: clean up.

Software Engineering Unit 2 - Course UE23CS341

Mocking in Practice

- Mocking replaces real dependencies with test doubles.
- Useful for isolating the unit under test.

Software Engineering Unit 2 - Course UE23CS341

RACI Matrix

- Responsible does the work.
- Accountable owns the outcome.

Software Engineering Unit 2 - Course UE23CS341

COCOMO Estimation

- Effort equals a times KLOC to the power b.
- Three project types: organic, semi-detached, embedded.
